

FactorSoft™ Key Integrations

The factoring world is both complex and interconnected, which is why we support a robust portfolio of integrations between FactorSoft and other key technologies. Below is a complete list of the integrations currently supported by FactorSoft.

CRM integration

Save time on manual entry by automating the transfer of client data to and from CRM systems.

Company	Description	Key Features
Decipher Credit	Automate the entire lending process from application to funding.	• Factoring Origination System • Automated underwriting and analysis • Smart documents • Salesforce-native capabilities

invoice processing

Streamline the intake of invoice data, notes, and images to speed up your funding approvals.

Company	Description	Key Features
FactorGenie	AI platform designed specifically for freight factors. AI audit and verification layer integrates directly on top of FactorSoft.	• Touchless funding and AI load audits • Automated debtor verification • Credit and risk intelligence • Automated collections and cash application • Credit intelligence and branded carrier app

invoice processing (continued)

Company	Description	Key Features
Artis	AI powered operating layer designed specifically for factoring operations; acts as the intelligent workflow engine that manages everything before and after the ledger work.	• Deep bidirectional API sync • AI document processing and auditing • Unified multi-channel intake • Exception based routing • Multi-instance consolidation • White-labeled client portal and embedded accounting • Automated verifications and collections
TriumphPay	Premier payment network and AI-driven back-office automation platform designed specifically for the freight industry; expanded factoring capabilities through the acquisition of Hubtran.	• Automated document auditing and processing • Direct invoice and image export • Automated NOA management and verifications • The “Triumph Network” effect • Centralized carrier payments
Bicameral	AI-powered document analysis and audit platform built specifically for secured finance, factoring, and asset-based lending.	• 100% automated backup auditing • Multi-industry document parsing • Exception-based routing • No-code customizable rule engine • Scalable document intake
Peruse	AI-powered freight invoice audit and document processing platform built specifically for the transportation and logistics factoring industry.	• AI-powered invoice matching • Advanced signature and exception detection • Forensic fraud prevention • Automated document classification • API data extraction
Transflo	Premier document management and workflow automation platform deeply embedded in the transportation ecosystem.	• The Network Effect Verifications • AI document classification and data extraction • 24/7 exception-based processing • Neutral infrastructure • Fraud risk mitigation

payment acceptance and processing

Automate payment records and improve real-time portfolio analysis.

Company	Description	Key Features
Tank Payments	Fintech platform and neobank built specifically for the freight and transportation industry.	• AI-driven receivables and cash application • Centralized exception management • Automated debtor collections • Connect payables (broker factoring and Quickpay) • Instant carrier payouts and multi-rail payments
AtoB	Fintech company specializing in the transportation and logistics sector, best known for its zero-hidden-fee fleet fuel cards.	• Integrated fuel advances and settlements • Carrier retention and stickiness • Centralized fleet expense control • Streamlined back-office reporting • Payroll and quick funding

integrations that make us better
