

## Business Banking

# JHA Treasury Management™

Give your biggest business users all the tools they need to manage their daily financial workflows and rest easy knowing they're just as powerful and efficient as those offered by the big guys.

**Powerful features for the people that need them**

Make sure your commercial banking users have everything they need – from payment processing, account visibility, effective reporting, comprehensive fraud mitigation tools, and much more.

**Unmatched revenue generation**

Bring your business to the next level by building new client relationships, generating fee income, and offering competitive services your people need.

**One-on-one assistance from product experts**

Our consulting services are the helping hand you need to move forward with Treasury Management – whether you're working through a product transition or just looking for a little support with your existing system.

JHA Treasury Management™

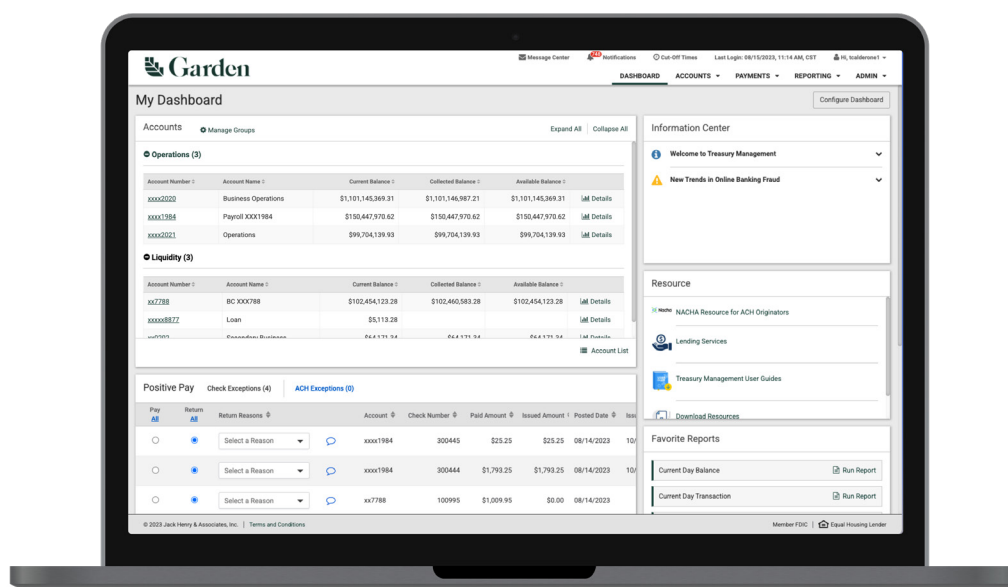

# simplify banking for large, complex businesses

Empower your financial institution to compete – and win – in the commercial banking game with JHA Treasury Management™, a platform designed specifically with your biggest business users in mind.

Welcome to the Big Leagues

## a comprehensive solution for big business banking

While Banno Business gives just-right features for your small and medium-sized businesses right where they bank personally, Treasury Management is a stand-alone, revenue-generating tool built to attract, serve, and maintain relationships with your largest business users. If your corporate banking users process high volumes of transactions, need visibility over many accounts, require access for multiple users with varying roles and permissions, or need advanced payment tools and additional approval layers, they'll feel right at home on our Treasury platform.

## Must-Have Features

# the perfect suite of cash management tools

As a company grows, overseeing its finances becomes more and more complicated. Treasury Management makes it simple for the whole team to accomplish their daily banking and money movement tasks – plus manage their company's long term financial position – by centralizing their entire workflow.

## Payment Processing

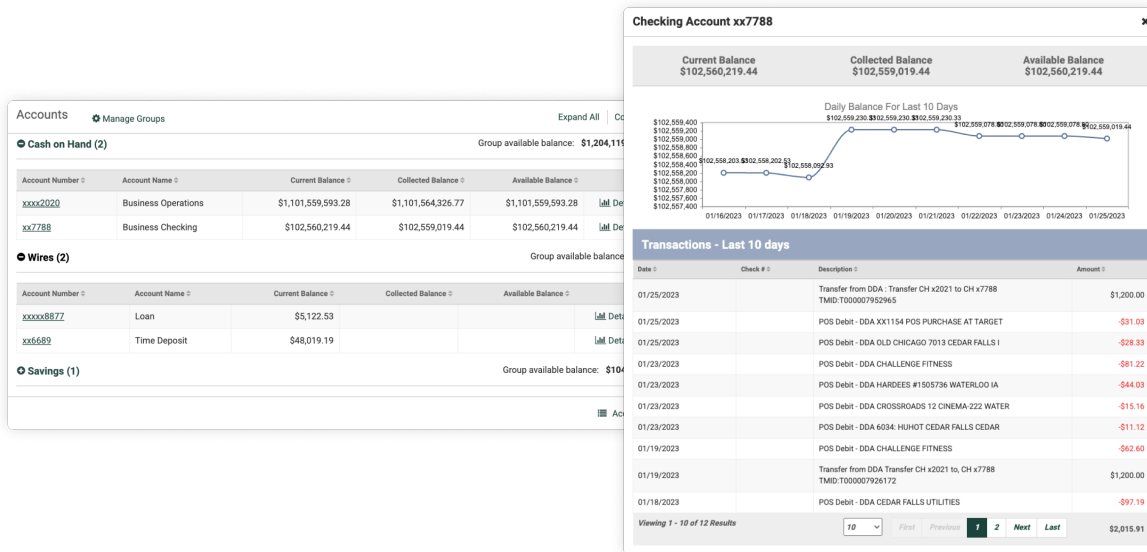

Moving money is the heart and soul of business operations. Whether you're paying a trade partner, reviewing collections, or depositing checks, Treasury Management has all the features your business users need to complete their financial operations. Payments – including ACH, wire transfers, and more – are all covered with efficient, workflow-driven processes, and recipients and payment templates can even be saved and used again and again.

The image displays three overlapping screenshots of the JHA Treasury Management interface, illustrating the workflow for creating different types of payments.

- Create Transfer:** This screen shows a multi-step process (1. Create Transfer, 2. Review, 3. Confirmation) for an "Internal Transfer". It includes fields for "Transfer From", "Transfer To", "Amount", "Frequency", "Transfer Date", and a "Memo".
- Create ACH Payment:** This screen shows a multi-step process (1. Create Payment, 2. Manage Recipients, 3. Review, 4. Confirmation) for an "ACH Payment". It includes fields for "Payment Name", "ACH Company Name", "ACH Company ID", "SEC Code", "Entry Description", "Discretionary Data", "Frequency", and "Effective Date".
- Create USD Wire:** This screen shows a multi-step process (1. Payment and Beneficiary Information, 2. Review) for a "USD Wire". It includes fields for "Wire Company Name", "Debit Account", "Beneficiary", "Wire Amount", "Frequency", "Effective Date", "Purpose", "Additional Information", and "Reference Beneficiary".

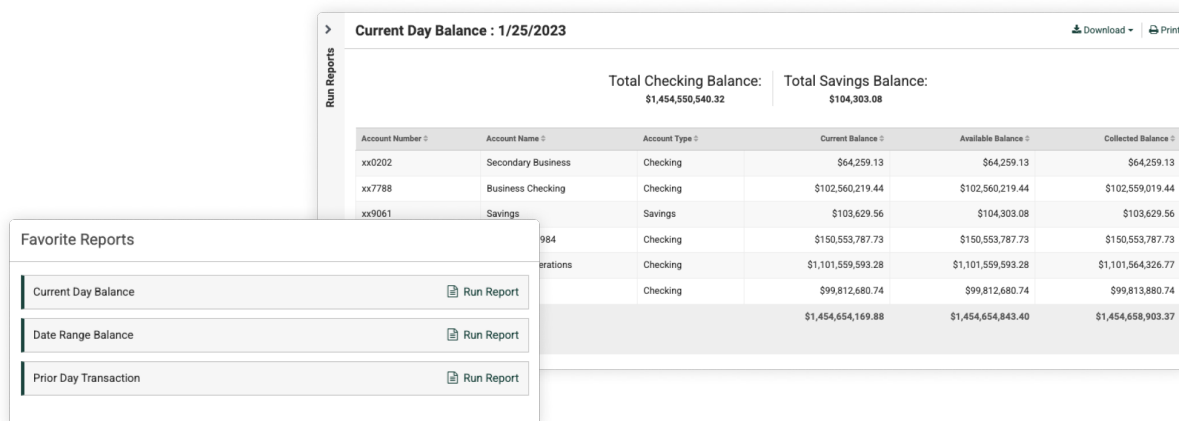

## Account & Transaction Management

Businesses often have to oversee many different accounts. Treasury Management brings all of them into one location, making it simple to get a full financial picture. Dig in to transaction activity through extensive search and filtering capabilities, and quickly transfer funds between accounts one-to-one, one-to-many, or many-to-one.

## Reporting

Keeping an eye on money movement at a high level is key to business success. Treasury Management gives users easy access to a catalog of reports with hundreds of custom combinations – everything from daily transaction reports to custom date-range balance reviews. Favorite reports can be saved on their dashboard for quick access, and exporting reports to share with the team has never been easier.

## Security & Fraud Mitigation

It's no secret that fraud is a constant concern for your commercial users. But fear not – that's where Treasury Management comes in. Shield your users with a set of comprehensive fraud mitigation tools, including positive pay, account reconciliation, extensive approvals, 2FA, and security alerts. In case users need to go back and review previous activity, the platform also keeps a clear audit trail, saving date and time stamps to easily identify transactions.

## Dashboard & Report Customization

Your business users' experience is the central focus of Treasury Management, and that starts with providing a customizable dashboard. Businesses can tailor the platform to include everything that fits their workflow – and nothing that doesn't – and each user can fine-tune their personal dashboard layout to organize accounts, quickly view their most important reports, highlight items that need attention, and more. You can even share important information and resources through the Information Center and Resource Panel widgets, fully controlled by your financial institution staff.

## Available Wherever People Work

Whether they're originating payments in the office or reviewing the day's transaction history while traveling offsite, Treasury Management is secure and accessible to users anytime, anywhere, on their desktop, tablets, and mobile devices.

### The Best of Both Worlds

## their business success is your business success

While Treasury Management is built to provide a stellar experience for your business users, we also have the growth of your business in mind. Revenue generation is the name of the game, and our Treasury platform is your secret weapon. The tools it provides make it easy to attract and retain commercial relationships, grow your deposits, generate fee income, and compliment credit products. Reach new milestones while making life easy for your customers – we call that a win-win situation.

### Treasury Management Consulting Services

## let's walk through this together

We know that adopting new processes can be hard, and product transitions can be harder. Our consulting teams are here to help at whatever capacity needed to keep you moving forward with clarity and confidence.

### How Does it Work?

To kick off the process, we'll work with you to complete a needs assessment. This helps us get an understanding of where you're at – whether you're new to Jack Henry, have been with us for years, or fall anywhere in between – and what your goals for the engagement are.

Next, our consultants will meet with you to design an engagement model that maps out your transition timeline, sets up a clear training plan for your team, and gets you ready to launch, support, and sell Treasury Management.

Finally, we'll get together to work through the engagement, leaving you prepared to use the Treasury platform to its full potential. Following the engagement, you'll even gain access to exclusive resources like detailed reference guides, parameter descriptions, and case studies.

## A Highly Customizable Program

We know every financial institution is unique – that's why our consulting services are designed to be adaptable. The length of our engagements can range from as little as one week up to three months or more, depending on your goals and timeline requirements. The topics we cover are up to you – whether you're looking to do a deep dive on payment features, learn best practices for onboarding and supporting businesses, or want to cover it all, our product experts can fine-tune the program to meet your expectations.

## Ready to Get Started?
