JHA OpenAnywhere™ Key Integrations

With the power to connect other tools, both from Jack Henry™ and third parties, differentiating and protecting your institution has never been easier. Our technology makes it easy to integrate and execute a digital account opening channel. Below is a complete list of the integrations currently supported by OpenAnywhere.

fraud prevention and identity verification

Ensure security from the start by safeguarding new accounts and applicants with rigorous verification measures.

Company	Description	Key Features
Alloy	A configurable fraud screening tool that helps automate decisions, approve more good applicants, and outmaneuver fraud.	• Uses 180+ data sources • Access specific inquiry details through Alloy's Dashboard • Pre-configured best practices bundle available
IDScan.net	Digital identity verification API provides ID validation, face match with embedded anti-spoofing, and third-party database checks to give you a deep understanding of your accountholders.	• OCR functionality pre-populates application fields • Selfie comparison • USPS address validation • DMV validation (39 supported states) • Can restrict file upload and force device camera entry only

ACH funding verification

Ensure compliance with the NACHA's web debit rule, that the applicant initiating the funding request belongs to the same person. *These services do not perform the actual ACH funding, however, OpenAnywhere has native code to collect the ACH transaction data in NACHA format with a simple export for processing in the core.

Company	Description	Key Features
Finicity*	A Mastercard company and leading data aggregator that provides increased security, visibility, and control over financial data.	• Routing and account number verification • Balance verification
Plaid*	Digital finance platform with a focus on microdeposits.	• Routing and account number verification • Balance verification • Microdeposit services

funding

Streamline processes to facilitate safe and efficient funding at the onset of the account.

Company	Description	Key Features
Authorize.net	Collect opening deposits with a card transaction.	• Visa gateway that supports debit/credit funding transactions.
Merchant's Pact	Collect opening deposits with a card transaction.	• Supports debit/credit funding transactions. • Runs on Authorize.net rails.

compliance documents

Provide the forms and support you need for smooth regulatory adherence.
